Classic childhood game

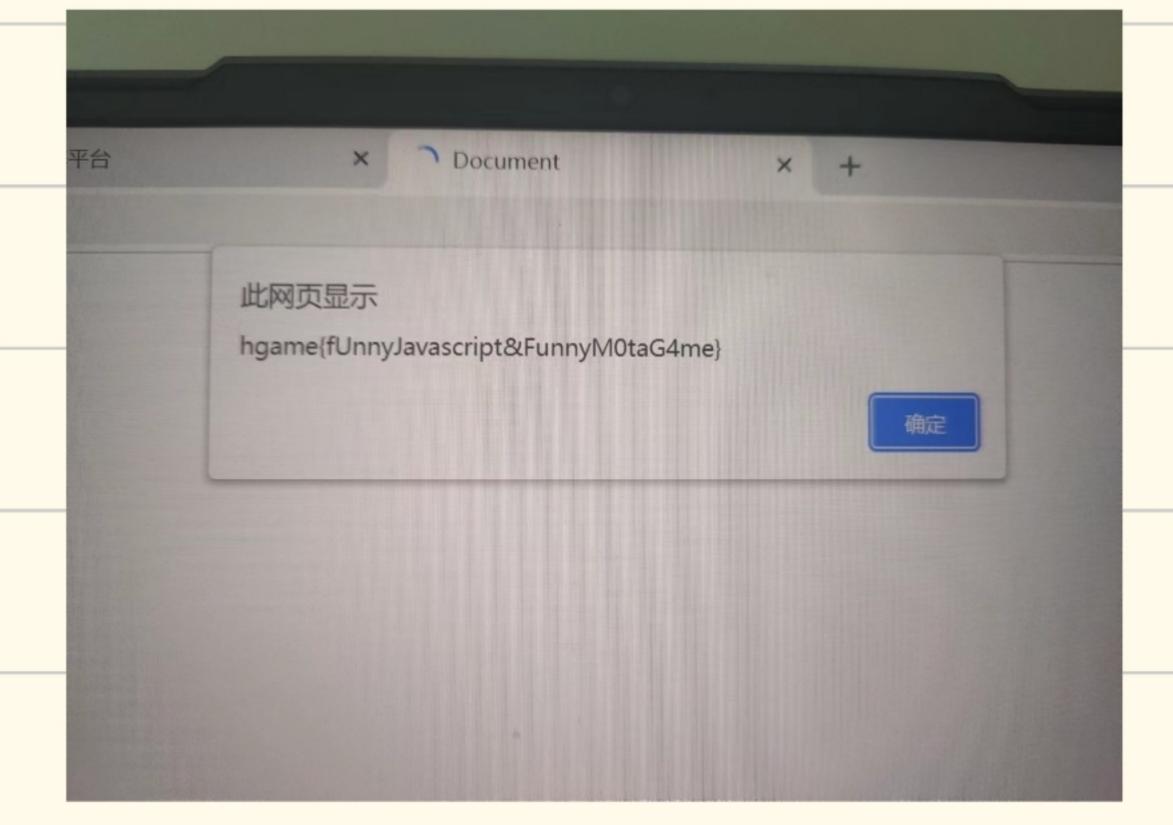

1、题目提示通关, 搜索关键调

2. 发现调用 mota() 函数

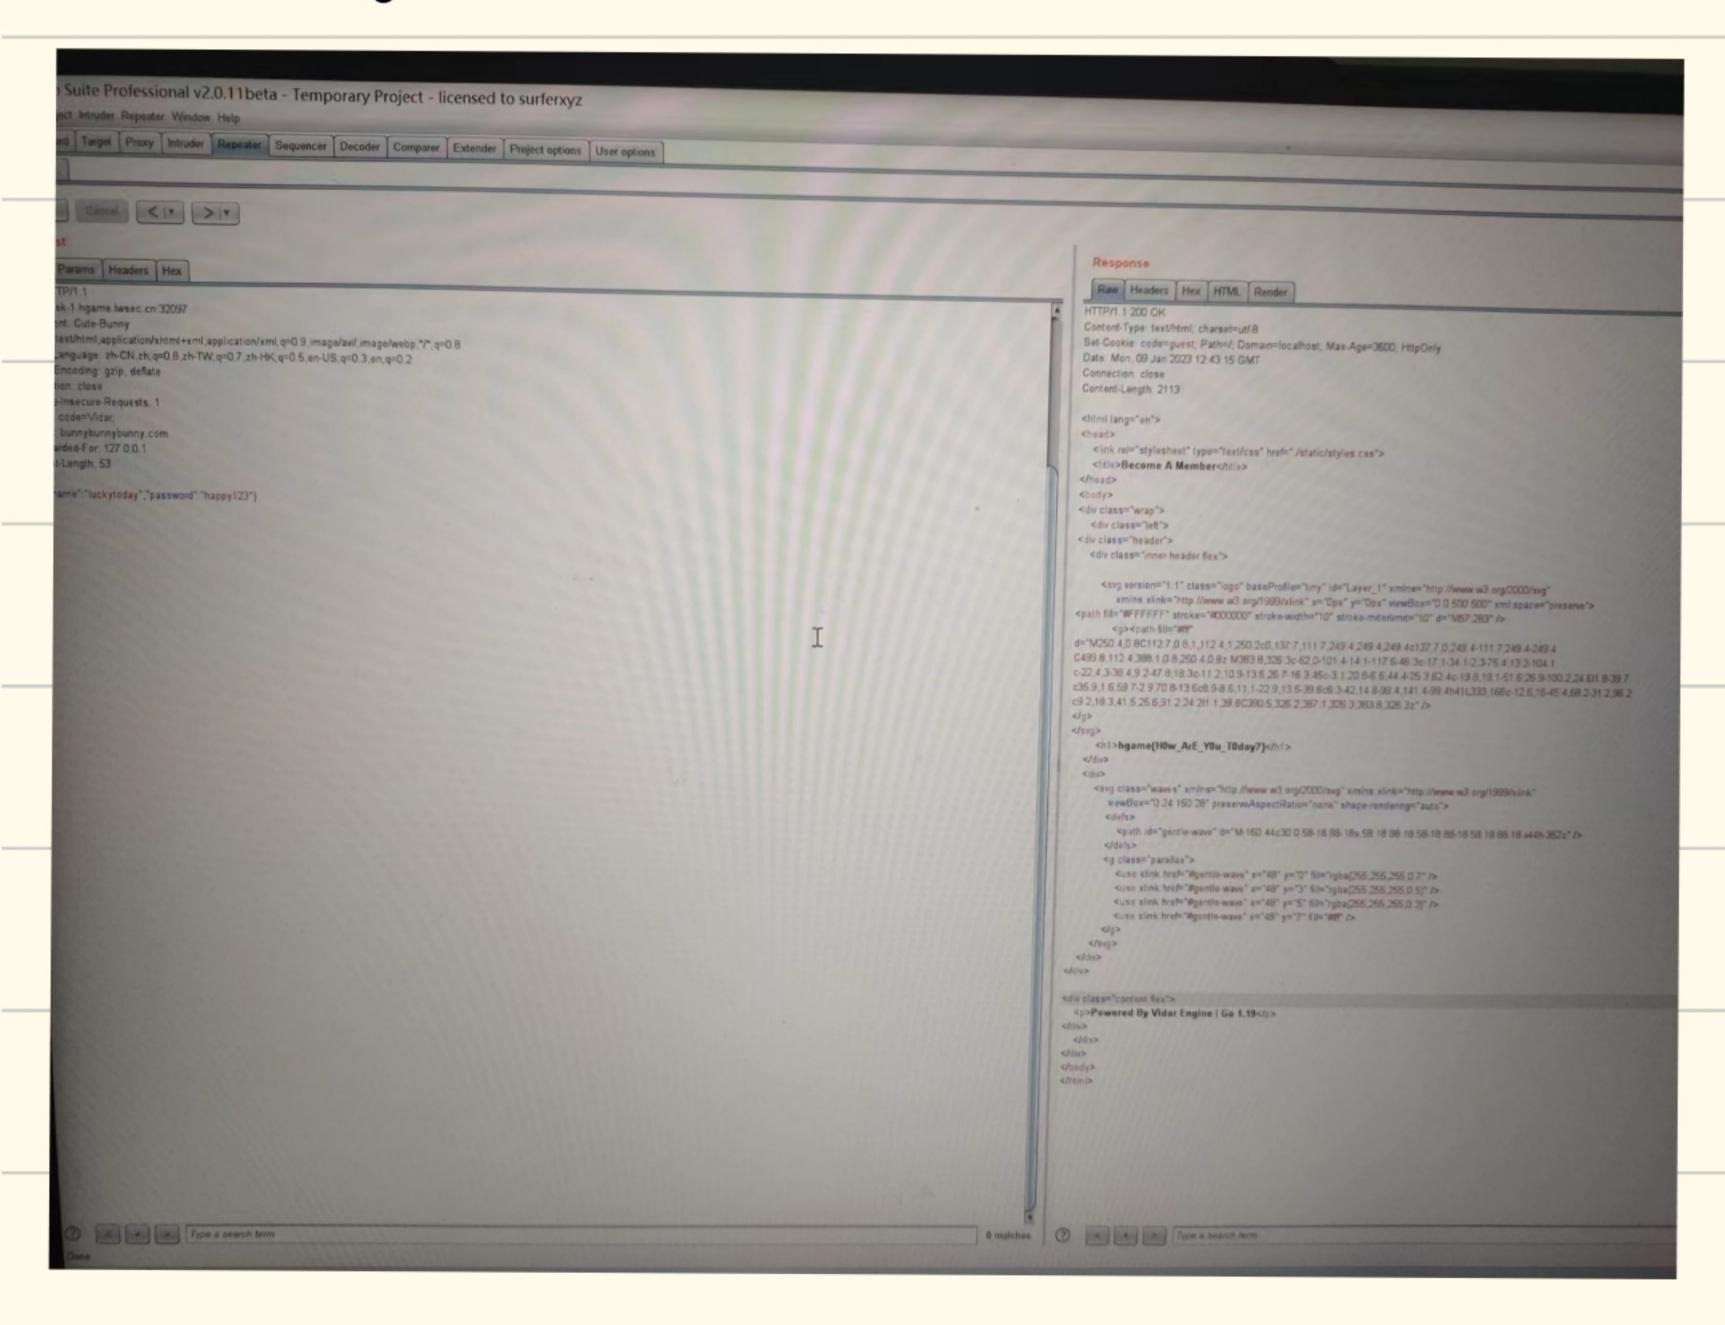

```
vent.AddEnemy(2, 55, 5, 3);
ndow.setTimeout(function () {
Event.ShowMessageList(Message, function () {
  Message = ["[Enemy=55,模仿者]你以为你这点能力能挑战我??"];
 Map.DrawBattleAnimate(1, 5, 3, function () {
    Event.ShowMessageList(Message, function () {
      Message = ["[Hero]呜哇(一口血吐了出来)", "[Enemy=55,模仿者]反正你迟早要被重置?
     Map.DrawBattleAnimate(0, 5, 2, function () {
       Event.setHero("HP", 0);
       Event.ShowMessageList(Message, function () {
         window.setTimeout(function () {
           Message = ["[Hero]玩家,恭喜你! 通关普通结局的纪元魔塔。", "[Npc=3,仙子]
           mota();
           Swent.ShowMessageList(Message, function () {
             location.reload();
            });
          }, 3000);
        });
      });
    });
  });
, 500);
break;
```

3. 调用·次 mota() 得 flag

Become a member

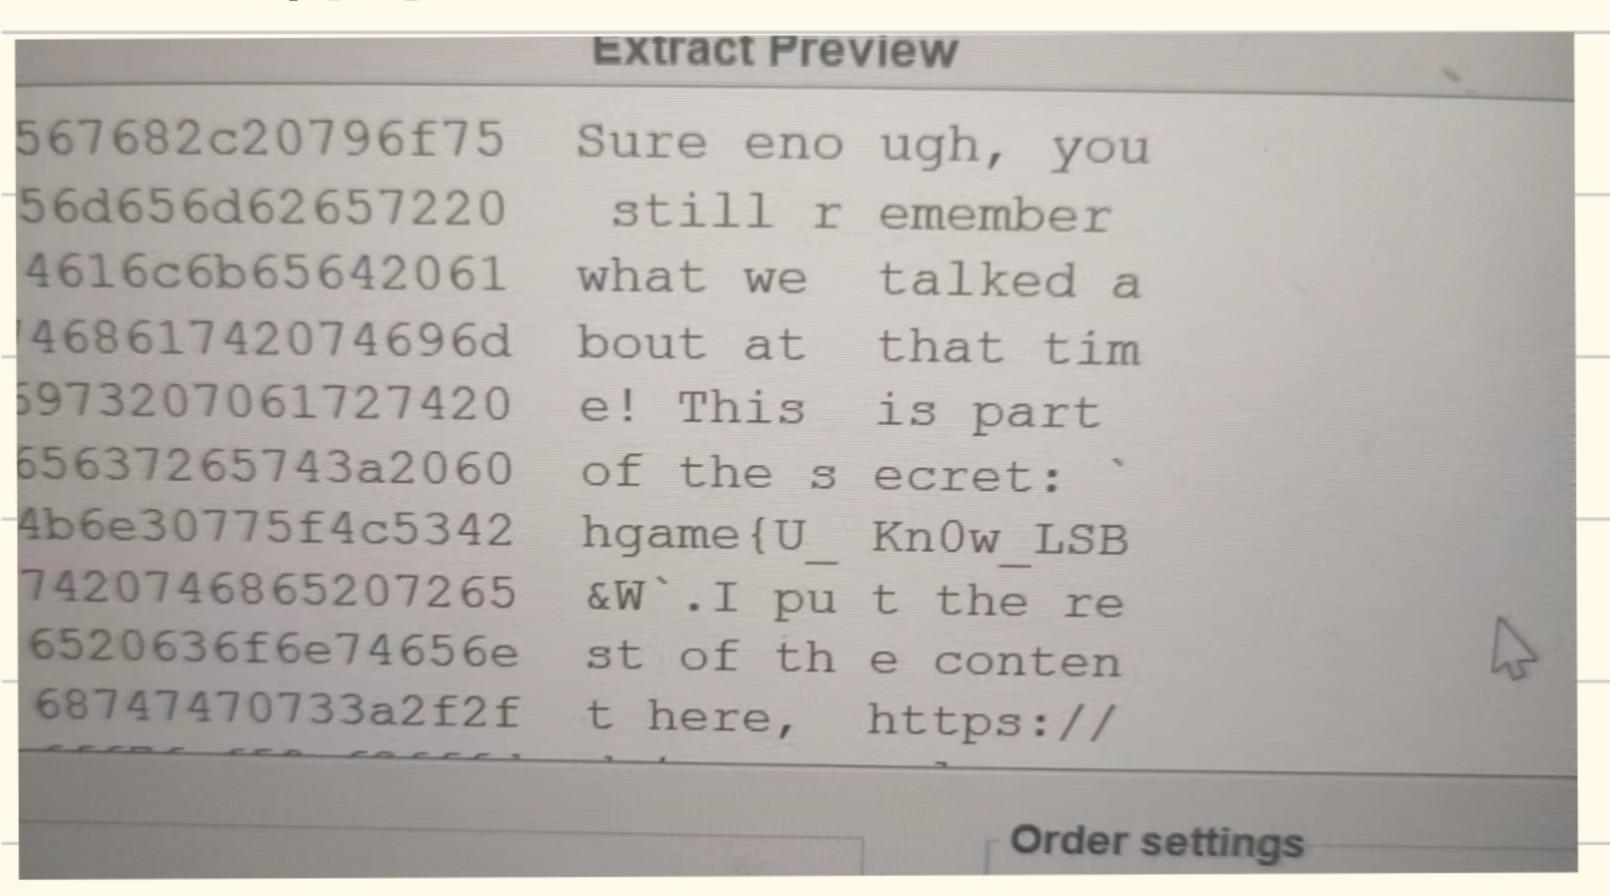

- 1.用bp抓http请求
- **2.**按照要求依次修改user-agent为cute-bunny,cookie为vidar,x-forwarded-for为127.0.0.1 referer为bunnybunnybunny.com
- 3.最后用json格式发请求,内容为账号密码

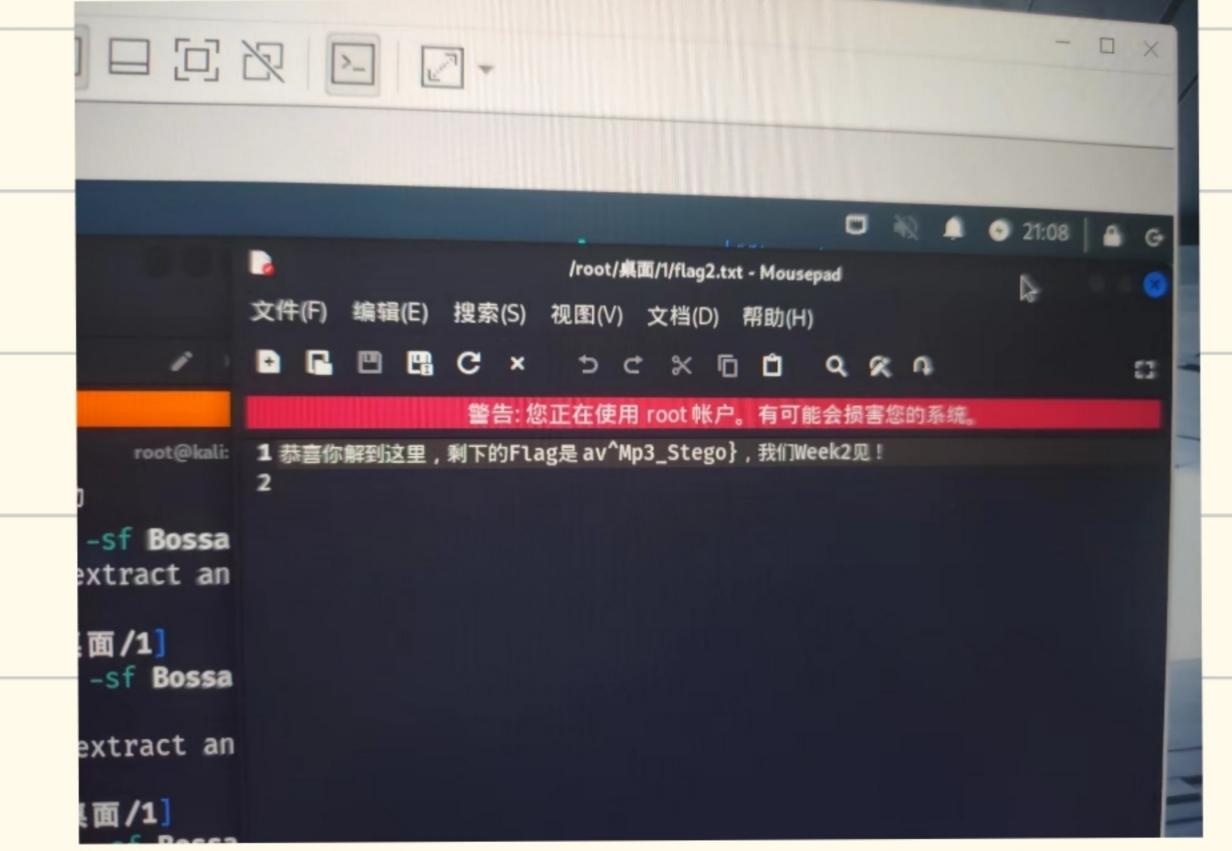

show me your beauty 1.先试着发送了一个PHP一句话代码,发现提示格式不对(eval(\$_post['data']);) 2.发送PNG格式的图片可以 3.感觉是后缀的问题,试着改文件后缀为pHp,发现可以上传 4.用蚁剑就可以找到flag文件了

神秘的海报

1.LSB隐写

3.得到flag

2.提示了用steghide加密,用kail解,密码猜123456,是对的
